EXECUTIVE SUMMARY

ON NEW CONTRIBUTIONS OF THE THESIS

1. The thesis: “Management of Public Investment Capital at Railway Project Management Boards in Vietnam”.

2. Major: Banking - Finance

Code: 934.02.01

3. PhD candidate: Pham Thi Loi

4. Scientific instructors:

- Assoc. Prof. Dr. Vuong Thi Thu Hien

- Dr. Le Thi Thuy Van

5. New contributions of the thesis are as follows

Firstly, the thesis systematizes and analyzes, thereby contributing to enriching a number of fundamental theoretical issues on the management of public investment capital for railway projects, including public investment in railway projects; public investment capital for railway projects; as well as the concepts, characteristics, requirements, principles, contents, influencing factors, and evaluation criteria for managing public investment capital in railway projects.

Secondly, the thesis reviews international experience in managing public investment capital for railway projects in several countries around the world and draws implications for Vietnam.

Thirdly, the thesis provides an overview of railway transport and the Railway Project Management Board in Vietnam; compiles, analyzes, and substantiates findings to draw several conclusions regarding the achievements, limitations, and causes of the current state of public investment capital management at the Railway Project Management Board in Vietnam during the 2016–2025 period.

Fourthly, the thesis presents the international and domestic economic context, along with the development strategy of the railway sector in the coming period; and proposes viewpoints, objectives, and two groups of solutions with multiple specific measures aimed at improving the management of public investment capital for railway projects in Vietnam through 2030.
